

My Circuit Breaker Journal

Live To Tell The Story

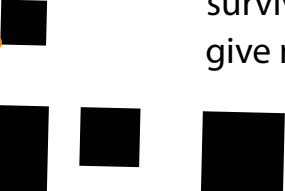

Note from the creator of this journal:

The period of lockdown due to COVID-19 has been unprecedented. It has been a time of vulnerability, uncertainty, complexity and ambiguity for many people. There has been a scary rate of deaths, a painful decline in financial health, and many other repercussions we have yet to see.

You may have had a lot of thoughts during this time. You may have pondered on the reason why all this happened. You may have asked what you can do for others who were severely affected by the circumstances. You may have acted generously. You may have asked about what else you can do. You may have sought what your purpose in life is.

Document those thoughts in this JOURNAL. Why? Because you can easily forget them once life goes back to how it was before. Why would you want to remember your thoughts during this period? Because you may never have these same reflections, convictions, and commitment to yourself again. The COVID-19 period could be, by far, the most unique our generation will ever go through in life. So I'd like to encourage you to take time to pause and write your thoughts down.

I say this because of my experience that may ring true to what everyone else will experience after the lockdown.

Shortly before Singapore went on a lockdown on the 7th of April, our family said goodbye to our 7-month-old son. He battled with a bacterial infection for two weeks and didn't survive. During my time in the hospital, I committed myself to give my family undivided attention whenever I am with them.

It was a few months after our son's death, and I found myself half-thinking about work while I played with our older son. I'd be busy with my phone many times whenever I was with him. Where did the commitment to be focused when I'm with the family? Reading my journal I wrote in when I was in the ICU helps me remember and act on my promise to myself.

I hope and pray that you will have a better perspective in life as we move into a new era. You are strong and courageous for having gone through what you have gone through in the last few months. Keep that head up.

All the best to you,

Joanna Blanding
